SUMMARY

AI and data science engineer focused on machine learning, explainable AI and fairness in AI. Built and deployed FairCKD, a fairness-aware kidney disease diagnosis system that finds and reduces bias between patient groups and explains every prediction. Experienced in Python, scikit-learn and XGBoost, with front-end development skills to turn models into working web apps.

EDUCATION

M.Tech, Artificial Intelligence & Data Science 2025 – 2027
Parul Institute of Engineering & Technology, Parul University · CGPA 8.40 / 10
Coursework: Machine Learning, Deep Learning, NLP, Big Data Frameworks, Data Analytics & Visualization, High Performance Computing

B.Tech, Computer Science & Engineering (Artificial Intelligence) 2021 – 2025
Parul University

Diploma in Engineering 2019 – 2022
Parul Institute of Engineering & Technology (GTU) · CGPA 9.11 / 10, First Class with Distinction

PROJECTS

FairCKD: Fairness-Aware Chronic Kidney Disease Diagnosis (M.Tech dissertation) Live · GitHub

- Found that a standard XGBoost model detected **85% of CKD cases in adults over 60 but only 32% in adults under 60**, using data from **5,454 patients** (NHANES and UCI).
- Compared **7 ML models**, measured bias with **5 fairness metrics** and applied **8 bias mitigation methods**; the fairness gap was reduced in **all 8 experiments** while accuracy stayed close to the best model.
- Explained each prediction with SHAP and LIME, validated externally on a separate NHANES survey, and deployed a 9-page Streamlit app with patient diagnosis and PDF reports.

Health Medico Management System Academic project

- Healthcare management system for patient records, appointments and medical histories, with a simple interface that improves communication between doctors and patients.

Personal Portfolio Website Live · GitHub

- Responsive portfolio built by hand with HTML, CSS and JavaScript and hosted on GitHub Pages.

EXPERIENCE

Frontend Developer Intern, MaMo TechnoLabs LLP, Vadodara Dec 2024 – Mar 2025

- Three-month full-time internship building responsive web pages with HTML, CSS and JavaScript.

Writing Intern, Marpu Foundation (Social Awareness Wing) Jul 2024

- Wrote content for social awareness campaigns on online platforms.

SKILLS

Machine learning: Supervised learning · Model evaluation · Cross-validation · Feature selection · Deep learning · NLP

Explainable & fair AI: SHAP · LIME · Bias detection · Bias mitigation · Fairness metrics · Fairlearn

Tools: Python · scikit-learn · XGBoost · pandas · NumPy · Matplotlib · Plotly · Streamlit · HTML / CSS / JavaScript · Git / GitHub

CERTIFICATIONS & LANGUAGES

Certifications: Google Cloud Platform Fundamentals, Google Cloud (2024) · Introduction to Cybersecurity, Cisco (2024) · Responsive Web Design, freeCodeCamp (2023)

Languages: English · Hindi · Gujarati
